## When to Divide Perennials

### Either spring or fall

|                     |              |                      |
|---------------------|--------------|----------------------|
| Acaena              | Gaillardia   | Perovskia            |
| Acanthus            | Galium       | Persicaria           |
| Achillea (spring)   | Geranium     | Phlomis              |
| Ajuga               | Geum         | Phlox                |
| Alchemilla (spring) | Heliopsis    | Physostegia          |
| Alstroemeria        | Helleborus   | Polygonatum          |
| Anaphalis (spring)  | Hemerocallis | Primula              |
| Arisaema            | Heuchera     | Pulmonaria           |
| Asarum              | Hosta        | Rodgersia (spring)   |
| Astilbe             | Iberis       | Rudbeckia            |
| Bergenia            | Inula        | Sanguisorba          |
| Brunnera            | Iris         | Sedum                |
| Campanula           | Lamium       | Stachys              |
| Centaurea           | Leucanthemum | Symphotrichum (spr.) |
| Cerastium           | Liatris      | Thalictrum           |
| Chelone             | Lobelia      | Thymus               |
| Coreopsis (spring)  | Lysimachia   | Tiarella             |
| Crocsmia            | Monarda      | Tradescantia         |
| Epimedium           | Nepeta       | Veronica             |
| Eutrochium          | Oenothera    | Veronicastrum        |
| Filipendula         | Origanum     | Yucca                |

### Fall

|               |                    |                  |
|---------------|--------------------|------------------|
| Ceratostigma  | Lilium Asiatic     | Phlox paniculata |
| Convallaria   | Macleaya           |                  |
| Iris sibirica | Papaver orientalis |                  |

## **Spring**

|                         |                         |              |
|-------------------------|-------------------------|--------------|
| Agapanthus              | Dodecatheon (late spr.) | Mazus        |
| Anemone                 | Erigeron                | Patrinia     |
| Antennaria              | Erodium                 | Penstemon    |
| Buddleia                | Ferns                   | Podophyllum  |
| Artemisia               | Gillenia                | Rheum        |
| Boltonia                | Grasses                 | Salvia       |
| Canna                   | Hacquetia               | Sidalcea     |
| Catananche              | Hedychium               | Sisyrinchium |
| Cephalaria              | Helenium                | Solidago     |
| Chrysanthemum           | Helianthus              | Spigelia     |
| Darmera                 | Kirengeshoma            | Stokesia     |
| Delphinium              | Libertia                | Tricyrtis    |
| Disporum (early spring) | Ligularia               | Vernonia     |

## **Division difficult/Not the best method**

|                          |                    |                    |
|--------------------------|--------------------|--------------------|
| Aconitum (spring)        | Clematis           | Kniphofia (spring) |
| Actaea (spring)          | Crambe             | Lavandula          |
| Agastache                | Dianthus           | Lupinus            |
| Amsonia                  | Dicentra (spring)  | Lychnis            |
| Anchusa                  | Dictamnus          | Paeonia (fall)     |
| Aquilegia (early spring) | Dierama            | Phygelius          |
| Armeria                  | Echinacea (spring) | Platycodon         |
| Aruncus (early spring)   | Echinops (spring)  | Polemonium         |
| Asclepias                | Eryngium           | Pulsatilla         |
| Aubrieta                 | Euphorbia          | Ruta               |
| Aurinia                  | Gaura              | Verbascum          |
| Baptisia                 | Hibiscus           |                    |
| Centranthus (spring)     | Knautia            |                    |
